Leveling

It's really important to get a professional in to level off your pool table. We provide service for pool tables that have shifted out of level and complete re-builds for pool tables that require additional work to them(not cosmetic).

Cushion Replacement

If the bounce off your pool table rails is less than lively, it is possible that the rubber on the rails has dried out or decomposed and needs to be replaced. If the rubber has detached from the rails, it can be re-adhered to the rails. Why is this important? The height of the nose of the cushion where the ball impacts is important to how the table plays.
